Time Timer Software

Updated version provides innovative new ways to visualize the passage of time

Promote the efficient use of time by using the Time Timer Software to turn your computer screen into a time measurement tool. The abstract concept of elapsed time is easy to see and understand with this graphic depiction. Manage time more effectively in meetings, classrooms, therapy sessions, testing venues, at home and any other activities which require limits to be set.

Wherever time needs to be measured and clearly understood, the Time Timer Software puts technology to work for you.

FEATURES/BENEFITS

- **Five distinct modes**
 - **HOURS:** full disk represents (12) hours
 - **MINUTES:** full disk represents (60) minutes
 - **SECONDS:** full disk represents (60) seconds
 - **CUSTOM:** full disk represents any length of time (up to 12 hours)
 - **CLOCK:** traditional analog clock shaded to represent any length of time (up to 12 hours)
- **Alarm** - optional audible signal to reinforce end of timed segment
- **Auto-repeat** - automatically repeat a timed segment as many times as needed
- **Lock-down feature** - controls the timed period so it cannot be easily altered by user
- **Full-screen display** - fill the screen with just the timer disc and face
- **"Always-on-top" mode** - keep application window floating above other applications (Windows only)
- **Full documentation** - offers comprehensive guidance through all phases of the program
- **Multiple languages** - English, German, French, Dutch and Spanish
- **Windows & Max (OSX) Compatible** - Both versions on every CD
- **Digiboard** - The Time Timer Cd-rom can be used on every Digiboard
